WORK EXPERIENCE

Architect

Microsoft India - Hyderabad, Telangana -

February 2005 to Present

- DevOps - One of the key members of the DevOps team in the Enterprise Services Global DevOps program.
- Readiness - Provide DevOps readiness to the end customer.

Sr. Program Manager

Microsoft India -

March 2016 to January 2018

Key Projects - Aurora BI (SAP), ES Analytics, BI as a Service, Service Center BI, Premier services (PSR)

I am accountable for implementing a unified analytical platform for the entire Enterprise Services business (~\$6 billion) in Microsoft. This allows the services business to strategize and take key operational decisions during the monthly and quarterly business reviews with the Leadership Team.

Key Responsibilities

- Product Owner - Manage & prioritize product backlog. Evangelize product feature with other teams and enable more product adoption.
- Product Roadmap - Prepare roadmap for the product for the upcoming fiscal year.
- Sprint Planning & monitoring - Scoping, resource levelling / smoothing
- Stakeholder management - Manage key business stakeholders, get / set expectations and manage communication.
- Risk management & mitigation
- Co-ordinate cross functional teams for product releases
- Product Retirement - Plan and manage existing product retirement, interact, communicate with all downstream systems to ensure product retirement and replacement is smooth.
- Product migration - Retire Informatica and migrate to Azure Data Factory for ETL process.
- Compliance Management
 - Global Data Protection Regulation (GDPR) - Analyze, estimation and planning for the BI group.

Key Skills - Microsoft Azure SQL DW, Azure Data Factory, SQL Server 2016, Power BI dashboard, Rest API

Methodology - Agile model

Architect

Microsoft India - Hyderabad, Telangana -

September 2013 to March 2016

McKesson, Singapore Provident Fund, SSE Home Services

Key Responsibilities

- Delivery Management - Provide technical leadership and strategic direction to the testing organization and project delivery team.
- Presales - Closely interact with customer & pre-sales team, response to RFP, Test estimates and prepare Statement of Work. Won multiple test only engagements from CEE, LATAM, India region
- Test Strategy & Test Plan development & review for test only engagements.
- Test Consulting Services - Worked with the UK based customer "SSE Home Services" to provide test consultancy and technical guidance to the offshore TCS Kolkata team.
- Test Processes - Defined process steps and quality gates for test only engagements at organization level.
- Quality Analysis - Analysis of trends in testing, identify best practices, improvement areas. I have prepared checklist for presales & delivery team that reduced the effort and cost of review and lead to faster turnover to the customer.
- Project Recovery Team - I am one the key members in the project recovery team. I work closely with the project team and leadership to ensure that the project is recovered successfully. I have successfully recovered 3 critical project with high quality. In the current recovery project, I have managed a team size of 103 team members.
- Project Delivery review- As a part of Technical Quality Assurance (TQA), I am the quality gatekeeper for all dashboard projects (~30 projects) within Microsoft Global Delivery. All test artifacts, test approach, test processes are reviewed and signed off during TQA review.
