

We are looking for a Big Data Engineer. Looking for an enthusiastic person to help migrate Smart towards more of a streaming architecture between the various data sources.

What You'll Need:

- Architect Level: 10+ years' experience in Advanced Analytics and Big Data with the minimum implementation of 2-3 projects at the enterprise level.
- Hands-on experience in architecting solutions at scale in big data.
- Solid functional understanding of the Open-Source Big Data Technologies including major Kafka projects.
- Proficient with SQL, Druid, Spark.
- Database design and modeling - logical and physical.
- Performance tuning - table partitioning and indexing, process threading.
- Hands-on experience with "commercializing" Hadoop applications (e.g. administration, security, configuration management, monitoring, debugging, and performance tuning).
- Support multiple Agile Scrum teams with planning, scoping and creation of technical solutions for the new product capabilities, through to continuous delivery to production.
- Must have worked with Machine Learning and Data Sciences applications in downstream with very strong experience in Python, SPARK Framework and deploying applications in the cloud.
- Detail-oriented with strong analytical and problem-solving skills.
- Effective communicator (both verbal & written).
