WORK EXPERIENCE

Consultant SDET

Microsoft -

June 2013 to Present

June 2013 - Present)
Product Technologies: Cloud & Mobile Migrations, DevOps for Test
Strategies, Visual Studio,
Azure.
• Orchestrated projects as an Individual Contributor and Led teams across
global engagements.
• Contributed to 60% of the software component automation in the
projects. Streamlined process
and tools for Dev-Ops implementation that included training, metrics and
reporting.
• Led Manual and Automated Test Management to elevate the quality of
Mobile (x Platform),
Cloud and IoT Applications. Designed, Developed and Maintained automation
coverage for UI
and API layer by handshaking Visual Studio with Open Source frameworks.
• Migrated millions of customers to Azure Cloud through FastTrack
program. Developed Tools that
reduced manual efforts worth 40 hours for each process.

Programmer Analyst

Cognizant -

March 2010 to May 2013

Built WCF services for iOS and Android Applications for a PoC which
helped business to grab more
mobile projects.
• Delivered quality of products to customers with the stipulated time.
Stand-ups, defect triage,
brown bag sessions, bug-bash and retrospectives. Owned and managed weekly
quality report.
• Initiated transformation of web to mobile apps within project and
assisted senior stakeholders
of the company in analyzing the opportunity.

Projects
IoT and Smart City Projects
• Formulated the use of VSO Dashboards for ease of status reporting which reduced manual
effort of an hour per day.

• Leveraged developer background to automate UI and API components through C#, Xamarin
UI in iOS and Android apps.
• Led process improvements that standardized operations that included on-boarding/reporting
and customer acceptance.

PubSec Projects - Dubai/Columbia/New York
• Coordinated between in-house and client teams and kept stakeholders informed of progress
and milestones.
• Supervised an avg. of 10-member software QA team in developing and implementing quality-
assurance and quality-control methodologies to ensure compliance with QA standards.
• Created tools that helped the development ecosystem by automating the long running manual
process.
• Brought a strong focus on "voice of the customer" into the software development function to
ensure product and customer success
