WORK EXPERIENCE

Senior Systems Engineer

Infosys

Software development

Systems Engineer, Infosys Hyderabad

Gas Request - Hyderabad, Telangana -

December 2014 to June 2015

December 2014 to June2015
This project involved creating a new application for the employees to record their in- timings and
out-timings and allowing them to regularize their working hours.
DESCRIPTION This web application was developed using MVC4, HTML5, JavaScript, MS-SQL 2012,
ASP.NET and some open source Javascripts like Slickgrid.
As a developer, my responsibility in this project included design, development,
reviews and testing.

Gas Request
(As Systems Engineer, Infosys Hyderabad)

Southern Gas
CLIENT Southern Gas, a wholly owned subsidiary of Atlanta Gas Light Resources (NYSE:

GAS), provides natural gas delivery service to more than 1.5 million customers in
Georgia.

ROLE
Developer
PERIOD
October 2013 to November 2014

This project involved creating a new application that accomplished the following- 1. Enabled the
customers to raise gas connection requests and register their complaints for failures in the gas connections.
2. Intimated the contract employees of AGL for repairing the faulty gas connections.
3. Enabled tracking of their processes by capturing their analysis and repair
DESCRIPTION status data.
The application enabled the employees to function offline also in remote areas through periodical
synchronizing of remote databases as and when connectivity became re-established
This web application was developed using MVC4, HTML5, JavaScript, MS-SQL

developer, my responsibility

-

2012 to 2012

in this project included design, development, unit and system testing.
