Sanand Pal
SQL and MSBI Developer with experience in Azure SQL and Data Lake
store.

I intend to establish myself as Software Engineer / architect with an
integrated business solution
provider through a long time commitment, contributing to the company's
growth and in turn
ensuring personal growth within the organization. I believe that my
technical, functional and
communication skills will enable me in facing the challenging career
ahead.

Willing to relocate to: Kolkata, West Bengal - hyderbad, Telangana

collaborative environment.
• Excellent written and verbal communication skills, good analytical and
problem solving skills.

SQL and SSIS developer/Sustain resource

MICROSOFT - Hyderabad, Telangana -

August 2011 to June 2016

Project
US EPG Forecast Workbook (FWB) application is designed to support the US
Enterprise Partner
Group (US EPG) in producing and maintaining the monthly US sales
forecast. It is a transactional
database combined with Microsoft Office Excel functionality that enables
end users to interact
with the USNAForecast database. Typically, an ATU manager will connect to
the corporate network
and download data from the forecast database, which creates an offline
forecast workbook. This
data can then be accessed offline, modelled, and changes to certain data
fields are subsequently
uploaded back to the forecast database through a CorpNet connection.
These changes are then
stored in the online database and subsequently loaded back into upstream
systems.

Responsibilities
• Involved in the Technical discussions/Sessions and efforts estimations and reviews.
• Involved in analysis of the Bugs/ Issues/defects/CRs.
• Involved in change requests on VSTO Excel application.
• Involved in design of database, tables and stored procedures.
• Developed SQL Server Integration Services packages for ETL process.
• Unit testing and bug fixing of the code.

• Actively solved the issues that raised during the integration cycle
• Performed build verification and Smoke tested all the defects raised before giving a delivery.
• Prepared and updated FS, TS and deployment guides.
• Provided knowledge sharing to Users
• Provided post implementation support
• Promptly check in the final Code in VSTF.

Hyderabad, India
